Billing Module - Client Documentation

Overview

The **Billing Module** is the core transaction processing system for retail jewelry operations. It handles all sales, purchases, returns, credit collections, and financial transactions with customers.

Module Navigation

!Billing Module Menu

Sub-Module	Entry Point	Purpose
New Bill	Billing → New Bill	Create sales, purchase, and return bills
Bill No Settings	Billing → Bill No Settings	Configure bill number formats

Sub-Module	Entry Point	Purpose
Search Bill	Billing → Search Bill	Search and view existing bills
Issue	Billing → Issue	Issue money to customers/employees
Receipt	Billing → Receipt	Receive money from customers
Approval Bills	Billing → Approval Bills	Approve pending bills
Jewel Not Delivered	Billing → Jewel Not Delivered	Track undelivered jewelry items
Bill Split	Billing → Bill Split	Split bills across multiple customers
Denomination	Billing → Denomination	Cash collection and denomination tracking

Priority Sub-Modules (Extensive Documentation)

1. New Bill

Entry Point: `admin_ret_billing/billing/add`

Purpose

Create customer bills for jewelry sales, purchases, returns, and various transaction types.

Bill Types

Type	Value	Description
Sales	1	Standard jewelry sales to customers
Sales & Purchase	2	Combined sales with old gold/silver purchase
Sales, Purchase & Return	3	Sales with purchase and return processing
Purchase	4	Pure old metal purchase from customers
Order Advance	5	Advance payment for customer orders
Sales Return	7	Customer returning purchased jewelry
Credit Collection	8	Collecting payment for credit sales
Order Delivery	9	Delivering customer orders
Chit Pre Close	10	Early closure of chit fund schemes
Repair Order Delivery	11	Delivering repaired items
Supplier Sales Bill	12	Sales to suppliers
Approval Sales Bill	15	Sales requiring approval

Billing To Options

Option	Description
Customer	Billing to individual customer
Company	Billing to a company/corporate entity

Option	Description
Supplier	Billing to a supplier

Key Form Sections

Header Information

- **Cost Centre:** Select branch/showroom (required)
- **Billing To:** Customer / Company / Supplier
- **Employee:** Sales employee assignment
- **Metal Selection:** Gold/Silver selection (when metal-based billing enabled)
- **Customer:** Search by name/mobile (required)
- **Customer Name:** Editable display name
- **Delivery Location:** Showroom or Customer Address

Item Entry Tab

- **Estimation No.:** Search by estimation number
- **Tag No.:** Search by item tag number
- **Order No.:** Search for order-based billing
- **Bill No.:** Reference bill for returns/credits

Sales Items Table Columns

Column	Description
Show HUID	Display HUID on invoice
HUID	Hallmark Unique ID
Item Type	Sales/Purchase indicator
Tag Code	Item tag identifier
Employee	Assigned salesperson
HSN Code	GST classification code
Section/Product/Design	Item categorization
Pcs	Piece count
Purity	Metal purity (22K, 18K, etc.)
G.Wt / L.Wt / N.Wt	Gross, Less, Net weights
Wastage (%) / Wt	Wastage percentage and weight
MC Type / MC	Making charges type and value
Rate	Per gram rate
Discount	Item-level discount
Taxable Amt	Pre-tax amount
Tax (%) / Tax	GST percentage and amount
Charges	Additional charges
Other Metal Amt	Secondary metal value

Column	Description
Amount	Total item amount

Total Summary Tab

- Sales total, Purchase total, Returns total
- Tax breakdown (CGST, SGST, IGST)
- TCS calculations
- Round-off adjustments
- Final bill amount

Make Payment Tab

Payment Modes

Mode	Description
Cash	Direct cash payment
Credit Card (CC)	Card payment via POS
Debit Card (DC)	Card payment via POS
Cheque (CHQ)	Payment by cheque
Net Banking (NB)	UPI/RTGS/IMPS/NEFT
Advance Adj	Adjust from customer advances
Scheme Closure	Chit/scheme fund application
Gift Voucher	Redeem gift vouchers

Credit Sales Requirements

- OTP verification (if enabled in settings)
- Admin approval workflow
- Credit due date specification

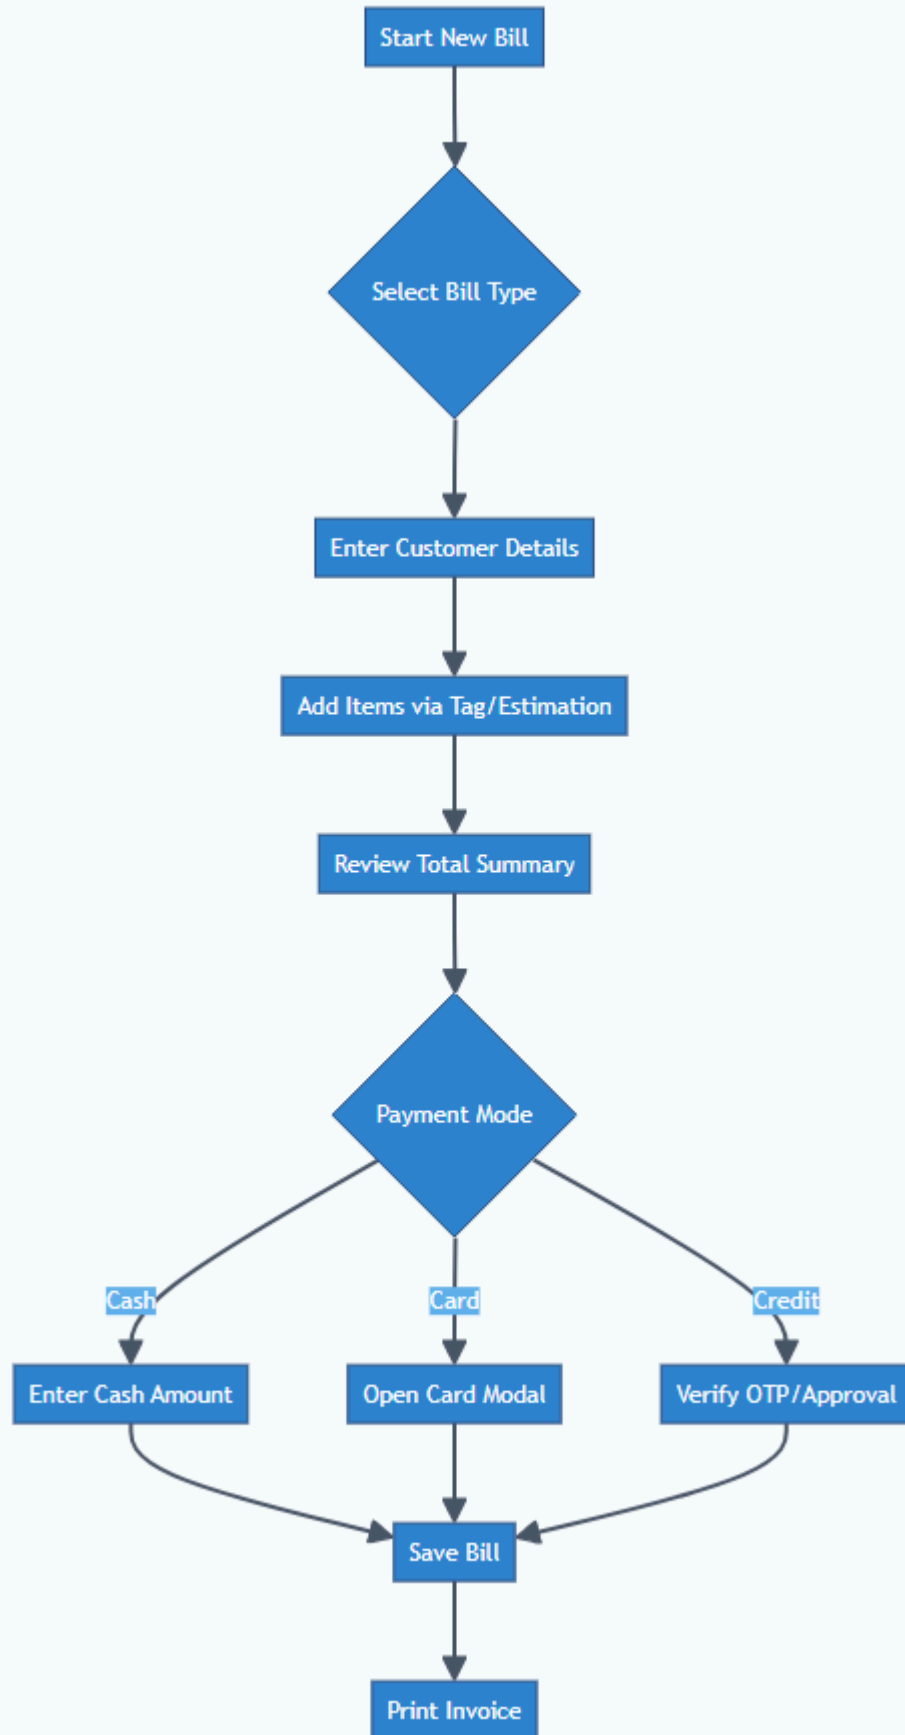

Packaging Item Tab

- Add packaging materials issued with sale

Customer Delivery Address Tab

- Manage delivery address for shipped items

Workflow

*Figure 1*

Settings That Affect Behavior

- `is_direct_bill_required`: Enable direct item entry
- `is_metal_for_billing`: Enable metal selection

- `is_tcs_required` : Enable TCS calculations
- `otp_dis_approval` : OTP for discount approval
- `credit_sales_otp_req` : OTP for credit sales
- `max_cash_amt` : Maximum cash transaction limit

2. Issue

Entry Point: `admin_ret_billing/issue/list` (list) / add (form)

Purpose

Issue money to customers, employees, or karigars for various purposes.

Issue To Options

Option	Value	Description
Employee	1	Issue to staff member
Customer	2	Issue to customer
Karigar	4	Issue to artisan/craftsperson

Issue Types

Type	Value	Description
Petty Cash	1	Small operational expenses
Credit	2	Credit to customer wallet
Refund	3	Refund against purchase/return
Expenses	5	Business expense payments

Key Form Fields

Field	Description	Required
Select Branch	Operating branch	Yes
Issue To	Employee/Customer/Karigar	Yes
Issue Type	Credit/Refund/Petty Cash	Yes
Account Head	Expense category	Conditional
Name	Recipient name (searchable)	Yes
Mobile	Contact number	Yes
Amount	Issue amount	Yes
Reference No	External reference	No
Employee	Processing employee	Yes
Narration	Description/notes	Required

Payment Section

Same payment modes as billing:

- Cash / Card / Cheque / Net Banking

Workflow

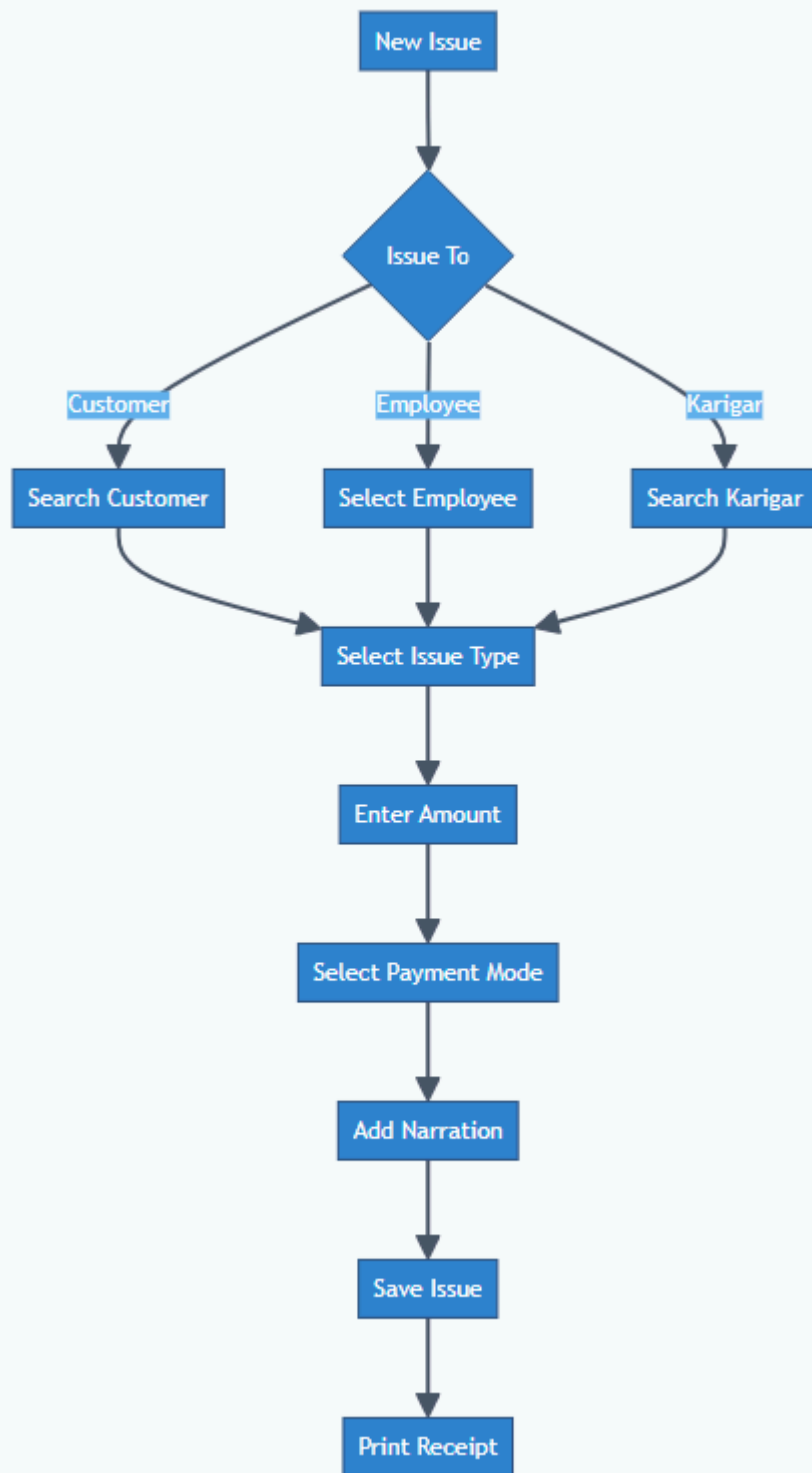

Figure 2

3. Receipt

Entry Point: `admin_ret_billing/receipt/list` (list) / add (form)

Purpose

Receive payments from customers for advances, credit collections, or chit closures.

Receipt Types

Type	Value	Description
Credit Collection	1	Collect pending credit amount
Advance	2	Receive advance for future purchase
Chit Close	6	Close/mature chit scheme
Petty Cash Receipt	8	Petty cash receipt
Amount Receipt	9	General amount receipt

Receipt Configuration

Setting	Options	Description
Receipt As	Amount / Weight	How payment is received
Store As	Amount / Weight	How to store in system
Rate Calculation	Gold / Silver	Metal for rate calculation
Against Estimation	Yes / No	Link to estimation

Key Form Fields

Field	Description	Required
Select Branch	Operating branch	Yes
Customer	Search by name/mobile	Yes
Receipt Type	Credit Collection/Advance/etc.	Yes
Receipt To	Employee/Karigar (for certain types)	Conditional
Against Est	Link to estimation	Optional
Amount	Payment amount	Yes
Weight	Weight (if weight-based)	Conditional
Date	Receipt date	Yes
Employee	Processing employee	Yes
Narration	Description	Yes

Payment Modes

- Cash / Card / Cheque / Net Banking / Advance Adjustment

ID Document Requirements

Based on amount thresholds:

- PAN Card
- Aadhaar Card
- Passport
- Driving License

Workflow

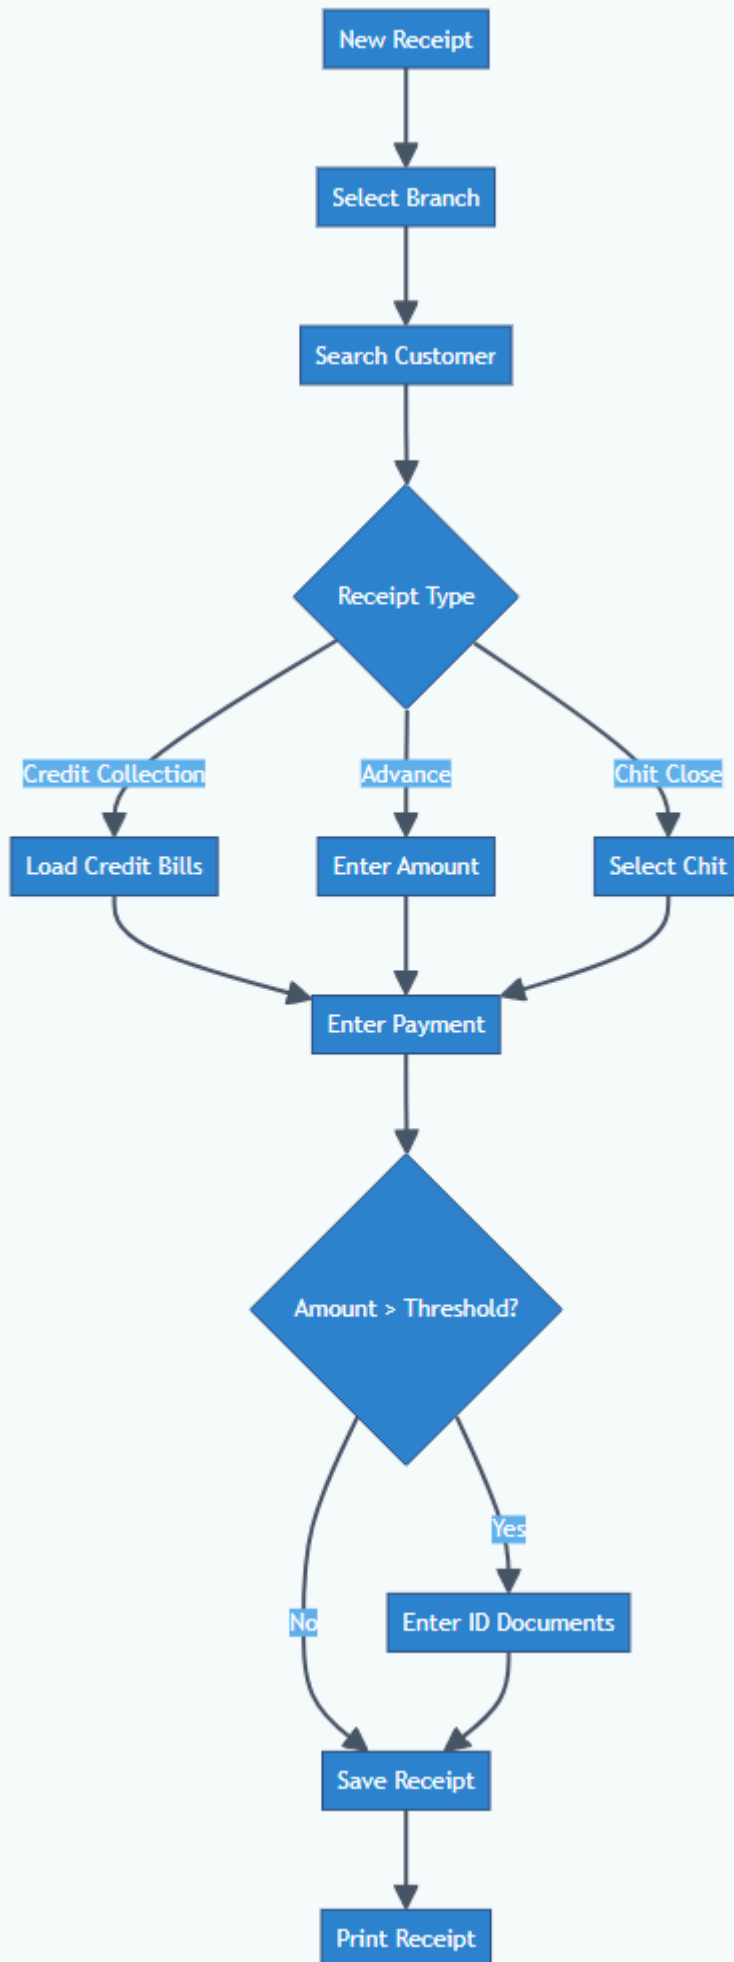

Figure 3

4. Bill Edit

Entry Point: `admin_ret_billing/paymentmode_edit/list`

Purpose

Modify customer details and payment information on existing bills.

Editable Fields

Customer Details Section

Field	Description
Customer Name	Update display name on bill
PAN Number	Update PAN for invoice
GST Number	Update GSTIN
Aadhaar Number	Update Aadhaar
Customer Type	Individual / Company
Employee Name	Change assigned employee

Billing Details Section

Field	Description
Received Amount	View total received (read-only)
Cash	Edit cash payment amount
Card Payment	Edit card payments via modal
Cheque	Edit cheque details via modal
Net Banking	Edit net banking details via modal

Card Payment Modal

- Card Name (VISA/RuPay/Maestro/Master)
- Card Type (CC/DC)
- Device selection
- Card Number
- Amount
- Approval Number

Cheque Modal

- Cheque Date
- Bank
- Cheque Number
- Amount

Net Banking Modal

- Payment Type (RTGS/IMPS/UPI)
- Bank/Device
- Payment Date
- Reference Number
- Amount

Workflow

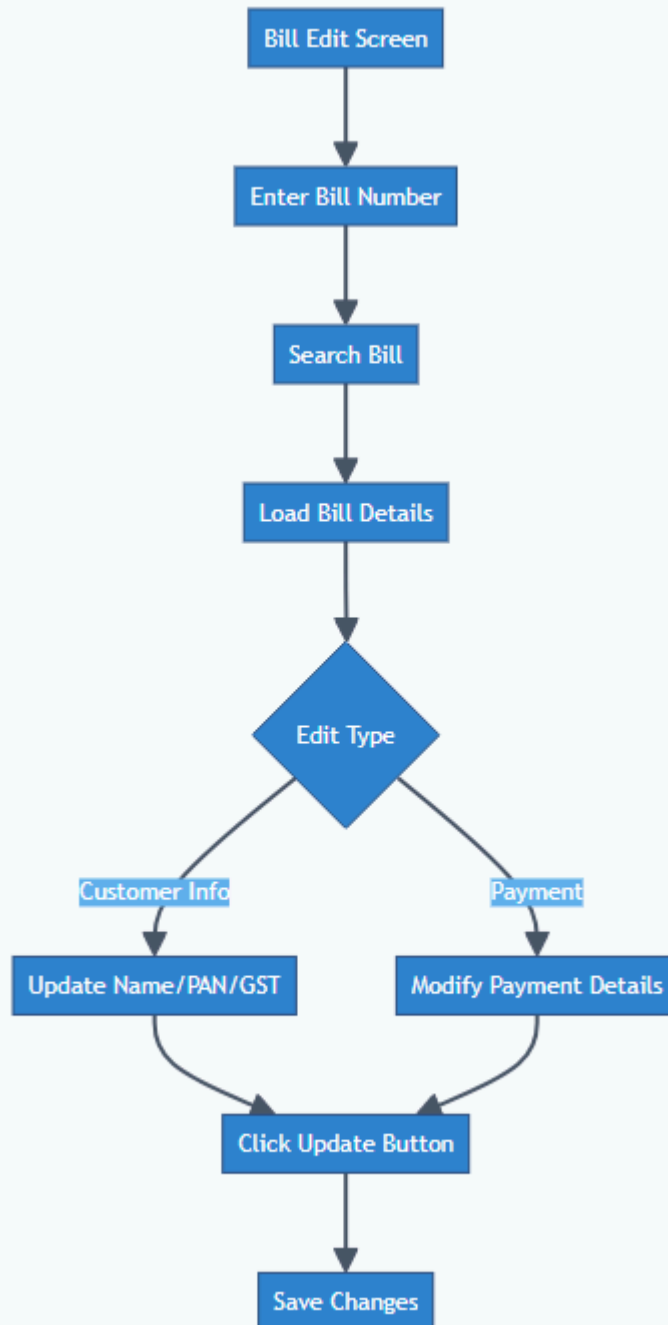

Figure 4

5. Bill Split

Entry Point: `admin_ret_billing/bill_split/list`

Purpose

Split a single bill across multiple customers with configured amount limits.

Split Types

Type	Description
Auto	System automatically splits based on settings
Manual	User specifies split amounts with comma separator

Configuration Settings

- `bill_split_min_amount` : Minimum amount per split bill
- `bill_split_max_amount` : Maximum amount per split bill

Key Features

Billing Header

- Same as New Bill (Cost Centre, Customer, Employee, Metal)
- Bill Type limited to Sales and Order Delivery

Sales Items Table (Extended)

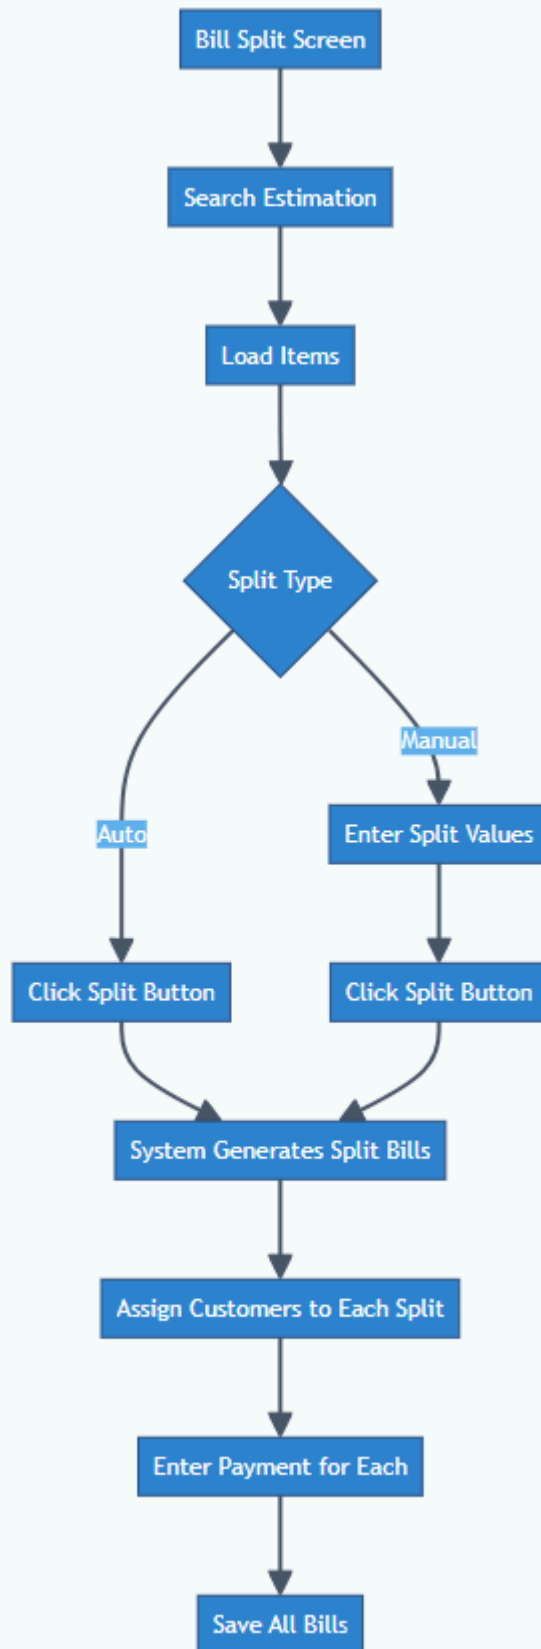

Additional columns for split billing:

- **No. of Bills**: Number of splits for item
- **Customer**: Individual customer per split
- **KYC**: KYC verification status
- **Is Credit**: Credit sale indicator
- **Recd Amount**: Amount received per split
- **Payment**: Payment mode per split
- **Due Date**: Credit due date per split

Split Purchase Items

Separate table for purchase portion splits

Workflow

*Figure 5*

Other Sub-Modules

6. Bill No Settings

Entry Point: `admin_ret_billing/bill_number_format/add`

Configure automatic bill number generation format with:

- Prefix text
 - Separator characters
 - Year format
 - Sequence number length
 - Reset frequency
-

7. Search Bill

Entry Point: `admin_ret_billing/billing/list`

Features:

- Search by bill number, date range, customer
 - Filter by bill type, status, branch
 - View, edit, cancel, and reprint bills
-

8. Approval Bills

Entry Point: `admin_ret_billing/billing/approvallist`

Workflow for bills requiring approval:

- View pending approval requests
 - Approve or reject with comments
 - OTP verification support
 - Mobile push notification approvals
-

9. Jewel Not Delivered

Entry Point: `admin_ret_billing/item_delivery/list`

Track items sold but not yet delivered:

- List of pending deliveries
 - Update delivery status
 - Mark items as delivered
-

10. Denomination

Entry Point: `admin_ret_billing/cash_collection/list`

Cash denomination tracking:

- Record physical cash count
 - Track denominations (2000, 500, 200, etc.)
 - End-of-day cash reconciliation
-
